Design and make your own boat to bring into school. It needs to be small enough to sit on a sheet of A4 paper as our sea is quite small. You can make it out of anything you like and in any design you like. Then bring it into school on Monday 10th July so we can test it to see if it floats or sinks. Your boat may not survive the test, but that doesn’t matter, we will take photos of it before and the fun is in the making of it. Be as creative as you like!

Here are a few ideas to get you started.
