28th January 2019

Dear Parents,

As part of our Design and Technology unit this term the children will be sampling a variety of muffins. The children will then design and make their own muffin.

The school will provide the main ingredients and some of the equipment. If possible could each child bring in their own plastic mixing bowl, wooden spoon and apron which is clearly labelled? If the children would like to bring in any special ingredients they can do but it must be a healthy option. We will talk to the children about the ingredients they may want to use.

These things will need to be brought into school on Wednesday 6th February 2019.

Please see your class teacher if there are any specific allergies they must be aware of for the sampling lesson. We also need several parent helpers to help prepare and cook the muffins from Wednesday 6th February to the 8th February. If you are able to help, please contact the school office.

Yours sincerely,

Mr Troughton and Mrs Hydes
